

## Diablo II: Lord of Destruction – Item Charts – Body Armor

Any warrior who has stared in the face of death during battle knows that even a piece of leather can mean the difference between life and death. Wearing stronger armor will make an opponent less likely to land a damaging blow on your character.

An armor's description indicates the strength needed to don the protection. If your character does not meet the requirement, the armor cannot be equipped. Unusable armor has a red background in your inventory. Armor descriptions also contain other important information, including defense value, chance to block an attack (if applicable), current and total durability, and any magical properties.

Armor can also affect your ability to run. Heavier armor depletes your stamina more quickly. This can be offset to some extent by increasing your character's vitality.

### Standard Body Armor

Picture	Class	Name	Min-Max Defense	Char. Level	Min Strength	Durability	Max Sockets	Type
	Normal	Quilted Armor	8-11	-	12	20	2	Light
